

WE'LL SHOW YOU THE WAY

TL Jones offers to the New Zealand elevator industry E-Motive brand display solutions to suit every requirement

Whatever your situation, we have the solution!

MonoChrome LCD Position Indicator

The FS054X Monochrome LCD Display from E-Motive Display is a good value, innovative and visually attractive lift indicator display, developed to provide a high-tech looking alternative to normal dot matrix displays.

Available in two colour combinations, eye-catching blue on yellow (shown at right), and contrasting dark grey on white, it can also be oriented either vertically or horizontally to suit the available space.

Since its introduction, the Monochrome display has evolved into more than just a LCD version of a dot matrix display: easily configured, it can convey building information through messages and logo graphics that can enhance corporate identity throughout a building. An ideal product for modernisation.

D1 Series: Ultra-slim colour LCD

Using the latest technology, the mid range D1 Series from E-Motive Display utilises high colour contrast and resolution for vivid imagery.

Available in two sizes (5.7" and 7.1") and only 18.5mm in depth, the compact, ultra slim design makes it a breeze for installation when space is limited. TL Jones is also able to configure your screen for you. Modernisation projects will not only be easier but also affordable.

Equipped with a LED backlight, common problems like dimness over time and a short lifespan are reduced.

Your elevator is not just a mode of vertical transport. The D1 series display will enhance your building's image instantly at a very reasonable price.

Eavis E1: The super-slim LCD screen

The ultra-slim Eavis E1 LCD display, is an innovative, highly versatile and reliable product. With easy PC-configuration, the E1 is able to display personalised messages, or provide marketing and advertising information for tenants and elevator passengers. Its 20mm depth is an added advantage when space is limited.

While providing the usual lift information, it also enhances a building's prestige status and a passenger's experience of lift travel. The E1 screen is the ultimate in sophisticated display solutions
